RESEARCH PROFILE

I am an immunologist working in computational single-cell analysis. I read immune cell state from large, incomplete single-cell and spatial data, and I check that it holds on held-out donors. The brain work I have done is single-cell immune profiling in an Alzheimer's mouse model, where I built the path from tissue harvest through 10x to the analysis, so what I would carry into human brain transcriptomics is the method rather than the tissue. What I would add is an immune-cell layer, and a way to separate immune programs that drive neurodegeneration from those that only track it. I also write my own funding: lead proposal writer on about \$1.3 million of funded industry grants and a more than 30 percent contributor to the roughly \$1.6 million SCAID atlas proposal.

POSITION-RELEVANT EXPERTISE

- **Brain immune single-cell analysis.** In the 5x FAD Alzheimer's mouse model I ran the path end to end: whole-brain harvest, enzymatic digestion, Percoll enrichment, CD45⁺ FACS, 10x, then the analysis. Ten immune populations from 11,587 cells, with exhausted CD8⁺ tissue-resident memory T cells engaging choroid-plexus epithelium at the blood-CSF barrier while that epithelium turned on MHC class I, interferon-stimulated genes and JAK-STAT signalling.
- **Cell-state calling and held-out testing.** From 251,055 memory CD4⁺ T cells with paired receptors, **consensus NMF** gave twelve reproducible gene programs from $k = 14$. Because 5' reads cannot separate the short and long PDE4D isoforms, I wrote UMI-aware, BAM-level code that returns to the alignments and assigns the isoform per cell. The short-isoform state recurs across 702 samples and 23 conditions in the SCAID atlas, and a classifier on subset composition reaches a held-out AUC of 0.780.
- **Methods that carry over.** Olink targeted plasma proteomics, **GeoMx DSP** region-of-interest microdissection and profiling, high-parameter flow panels, and **scVI/scANVI** integration with **Milo** differential abundance are assays and analyses I have run, on immune cells and tumour tissue. I also designed the causal overexpression test in the PDE4D study.
- **Atlas-scale quality control across sites.** Multi-site sample QC, milestone tracking and multi-PI coordination across the 700-donor, 8-organ SCAID atlas, with reference material in every collection round and batch written into the model as a variable rather than hoped away.
- **Grants written.** Lead proposal writer on two Korea Drug Development Fund awards for an anti-CD40 antibody (about \$571,000 and \$321,000), on two Ministry of SMEs and Startups awards, and on the proposal and study design for a NAVER-funded engineered Treg program, about \$1.3 million in all. More than 30 percent of the SCAID proposal, funded at about \$1.6 million. All were held by the institutional principal investigator, so my role was proposal writing and project execution, not as PI.

EDUCATION

DEGREES

Ph.D.
2014-2023 **Seoul National University**, Seoul, Republic of Korea
Department of Biomedical Sciences
Thesis: Exploration of the Role of Regulatory T cells in Various Pathogenic Contexts
Advisor: Chung-Gyu Park, M.D., Ph.D.

M.S.
2012-2014 **Seoul National University**, Seoul, Republic of Korea
Department of Biomedical Sciences
Thesis: Enhanced LPS-Induced Monocyte Activation by Recombinant Human Soluble CD14
Advisor: Chung-Gyu Park, M.D., Ph.D.

B.S. Sungkyunkwan University, Suwon, Republic of Korea
2008–2012 Department of Genetic Engineering

RESEARCH & PROFESSIONAL EXPERIENCE

Researcher (postdoctoral) Yonsei University Wonju College of Medicine · Dept. of Physiology / Organelle Medicine Research Center, Wonju, Republic of Korea
2025–present Deep-learning multimodal-integration models fusing imaging, transcriptomic, and clinical data into single predictive models.

Associate Director PB Immune Therapeutics Inc. · Dept. of Basic Research, Seoul, Republic of Korea
2023–2025 Led a humanized anti-CD40 antibody program: candidate ranking by **surface plasmon resonance (Biacore)** and ELISA, receptor-blocking confirmation, human and non-human-primate cross-reactivity, in vivo efficacy in primates, and the regulatory documentation. Placed and oversaw CRO and core-facility work, from study design and assay conditions through data delivery and go/no-go calls. Built the in-house single-cell and spatial analysis pipeline. Ran cynomolgus and marmoset EAE studies for multiple sclerosis programs.

Manager PB Immune Therapeutics Inc. · Dept. of Basic Research, Seoul, Republic of Korea
2021–2023 Wrote the two KDDF proposals that funded the anti-CD40 program and ran the lead-selection work under them.

Research Student SCAID, Single Cell Atlas of Immune Diseases, Genomic Medicine Institute, Seoul National University, Seoul, Republic of Korea
2020–2023 Contributed the founding proposal; executed within the funded program (700+ donors × 8 organs): milestone tracking, multi-site QC, multi-PI coordination.

Researcher Xenotransplantation Research Center, Seoul National University, Seoul, Republic of Korea
2019–2021 Rhesus macaque tissue processing and longitudinal immune monitoring across transplantation studies.

Teaching Assistant Seoul National University College of Medicine · Dept. of Microbiology and Immunology, Seoul, Republic of Korea
2014–2016

Co-author (immunology). Ran the Olink plasma proteomics across 12 patients and 6 controls and the flow-cytometry immunophenotyping of lymph-node leukocytes.

■ TECHNICAL EXPERTISE

Brain and CNS tissue	Mouse brain immune profiling run end to end: whole-brain harvest, enzymatic digestion, Percoll enrichment, CD45 ⁺ FACS, 10× library generation, and the analysis (<i>J Neuroimmunol</i> 2025, first author; 5×FAD model, 11,587 cells, 10 immune populations). Neuro-immune analysis of choroid plexus epithelium and infiltrating CD8 ⁺ resident-memory T cells at the blood-CSF barrier. Non-human-primate CNS tissue, brain and spinal cord, across rhesus, cynomolgus and marmoset studies, including EAE models of multiple sclerosis.
Cell-state calling and its checks	Consensus NMF gene programs (k = 14 → 12 reproducible programs across 251,055 memory CD4 ⁺ T cells). Custom UMI-aware, BAM-level isoform code (Python) resolving PDE4D short-versus long-isoform identity from 5' reads, which a count matrix cannot separate. Milo KNN-graph differential abundance; scVI/scANVI integration; condition classifiers reported with held-out AUC and confidence intervals. Multi-site sample QC, milestone tracking and multi-PI coordination across a 700-donor, 8-organ atlas (SCAID).
Single-cell / spatial / multi-omic	scRNA-seq, scTCR-seq, snRNA/snATAC; 10× 5'/3' library generation and 10× Chromium Connect automated preparation. Seurat , Scanpy , Squidpy , Monocle3 , CellChat/NicheNet ; scVI/scANVI, batch integration, consensus NMF ; Milo KNN-graph differential abundance, GLIPH, InferCNV. Custom UMI-aware, BAM-level isoform analysis code (Python). Spatial: GeoMx DSP run end to end, Visium , MACSima cyclic multiplexed immunofluorescence.

Computational	Python: scikit-learn, XGBoost/LightGBM/CatBoost, PyTorch ; AUC-validated classifiers held out on independent cohorts; multimodal deep-learning integration (imaging + transcriptomic + clinical). Linux servers · R/RStudio · Git-based reproducible analysis.
Cell, tissue & immunological assays	Primary human T-cell isolation, expansion and functional assays; monocyte and dendritic-cell differentiation; mesenchymal stem cell culture. Enzymatic tissue digestion, Percoll enrichment, cell and nucleus isolation. High-dimensional flow cytometry (panels up to 24 markers); multiplex panel design; 10-color 6-way FACS. Olink targeted plasma proteomics (immune & neurology panels).
Microscopy & animal models	Spinning-disk confocal (Nikon CSU-W1 SORA), point-scanning confocal (Leica SP8), two-photon; IHC/IF (frozen & FFPE) with quantitative image analysis. Non-human primates across three species (rhesus, cynomolgus, marmoset), including EAE and islet-transplantation studies; mouse immune profiling.
Program & external execution	CRO and core-facility work from study design and placement through data delivery and go/no-go calls; assay conditions specified to the vendor; regulatory documentation for a therapeutic antibody program; funder milestones and reporting; multi-site sample QC across a 700-donor collection.
Binding & protein interaction	Surface plasmon resonance (Biacore) run hands-on for antibody lead work: association and dissociation rates, affinity ranking across a candidate panel, receptor-blocking confirmation, and human / non-human-primate cross-reactivity. ELISA -based affinity and epitope analysis; competition binding. Antibody lead selection and optimization from candidate panel to registered patent. Functional validation of a peptide inhibitor of calcineurin in primary human T cells (CABIN1 core peptide, <i>Exp Mol Med</i> 2022).

BOOKS

Seong-Jun Kang, Do-gyun Kim, Jin-seon Han. **AI Drug Discovery: A Practical Guide for Medical and Biomedical Researchers** (title translated). Beommun Education. Forthcoming September 21, 2026. 548 pages. ISBN 979-11-5943-583-6. [Publisher](#)

The book covers molecular and protein data preparation, QSAR, ChemBERTa, graph neural networks, docking, virtual screening, candidate optimization, and follow-up experimental validation.

SELECTED GRANT WRITING & PROGRAM FUNDING

INDUSTRY · PB IMMUNE THERAPEUTICS (MANAGER → ASSOCIATE DIRECTOR)

FUNDING AGENCY / SPONSOR	PROJECT	PERIOD	BUDGET (USD)	ROLE / CONTRIBUTION
Korea Drug Development Fund (KDDF)	Anti-CD40 antibody lead selection and optimization (multiple sclerosis)	2021–2023	~\$571,000	Lead proposal writer (>90% of proposal & execution)
Korea Drug Development Fund (KDDF)	Anti-CD40 lead compound (PB101): efficacy and pharmacodynamic biomarkers (pemphigus vulgaris)	2022–2024	~\$321,000	Lead proposal writer (>90% of proposal & execution)
Ministry of SMEs and Startups (MSS)	Scale-up Funding for Tech Commercialization	2022–2023	~\$222,000	Lead proposal writer; managed >90% of execution
Ministry of SMEs and Startups (MSS)	Early-stage startup R&D: anti-CD40 biologic (PB-40N) to prevent anti-drug antibodies	2021–2022	~\$74,000	Lead proposal writer & core researcher
NAVER Corporation	Engineered regulatory T cells for immune-mediated diseases (PB20X_Treg)	2023–2026	~\$128,000	Proposal & study design (~50%)

FUNDING AGENCY / SPONSOR	PROJECT	PERIOD	BUDGET (USD)	ROLE / CONTRIBUTION
Ministry of Science and ICT (MSIT)	Multi-layered immune-disease single-cell map for molecular target discovery (SCAID, A9-22-1-05)	2022-2028 (3+3)	~\$1.6M	Participated in proposal writing (>30%)
Ministry of Education (MOE) & Ministry of Science and ICT (MSIT)	Laboratory-Specialized Tech-Transfer & R&BD Grant	2020-2021	~\$40,000	Grant writing, experimental design & technical validation

All grants were held by the institutional Principal Investigator (Ph.D. advisor at SNU; company CEO/CSO at PB Immune Therapeutics); the listed roles reflect the applicant's contribution to proposal writing and project execution, **not as PI**. Budgets converted at ≈ ₩1,400 / USD.

AWARDS, PATENTS & SCHOLARSHIPS

PATENTS

2024	Antagonistic Anti-CD40 Humanized Antibody. Republic of Korea, Appl. No. 10-2024-0085972; registered 2024-07-01. Co-inventor.
2019	Immunosuppression Composition Comprising JAK Inhibitor. Republic of Korea, Appl. No. 10-2014-3490000; registered 2019-08-20.

AWARDS

2024	Grand Prize , 2024 GPTers AI Hackathon (Project GAIA Team)
2023	Grand Prize , SBA Smart Workathon (Work Process Innovation)
2017	Best Poster Award , American Transplant Congress, Chicago · Best Presentation Award , Korean Association of Immunologists

SCHOLARSHIPS

2014-2020	NRF Research Scholarship for Ph.D. Candidates · Dean's Lecture & Research Support Scholarship, SNU College of Medicine · BK21 Plus Research Scholarship
-----------	---

SELECTED PRESENTATIONS

Poster	KAI Annual Meeting, Incheon (2022) · Cytokine, Hawaii (2022) · American Transplant Congress, Chicago (2017) · The Transplantation Society, Hong Kong (2016) · IPITA/IXA/CTS, Melbourne (2015) · TREG, Shanghai (2012)
