*Immunologist working on single-cell and multiplexed measurement of immune responses, in transplantation, neuroinflammation, and inflammatory disease*

Postdoctoral Fellow applicant · BioTranslation Lab, Center for Nanomedicine, Brigham and Women's Hospital and Harvard Medical School (Position 3: Immunology and Immunoengineering)

---

## RESEARCH PROFILE

I am an immunologist studying immune responses after therapeutic intervention. My doctoral work included non-human-primate islet transplantation, and at PB Immune Therapeutics I led an anti-CD40 program and designed EAE studies in cynomolgus monkeys and marmosets. I would contribute longitudinal immune monitoring, single-cell analysis, and preclinical study execution to transplant-tolerance research.

## ■ POSITION-RELEVANT EXPERTISE

---

- **Multi-modal cellular measurement.** 10x single-cell workflows, end-to-end GeoMx DSP, Visium spatial transcriptomics, MACSima cyclic multiplexed immunofluorescence, high-parameter flow cytometry, and targeted proteomics.
- **Computational analysis.** Sequencing-data analysis in Python and R using statistical and machine-learning tools, multimodal integration, and donor- or case-level evaluation; co-authored an AIDD workflow spanning target discovery, binding prediction, virtual screening, and lead optimization.
- **Wet-lab and translational experiments.** Primary-cell culture and DNA/RNA processing; 10x Chromium scRNA-seq and GeoMx DSP spatial workflows; SPR and ELISA binding assays; and Olink proteomics.
- **Animal experiments.** EAE and Alzheimer's disease models; skin- and islet-transplantation studies; animal breeding and longitudinal immune monitoring.
- **Program and study execution.** Multi-site sample QC, non-human-primate studies, and proposal writing and execution for approximately \$1.3 million in industry awards.

#### MANUSCRIPTS IN PREPARATION

- 2026 Kangsan Roh\*, Sabyasachi Das\*, **Seong-Jun Kang**, Olga Barreiro, Rodrigo Javier Gonzalez, Timothy P. Padera, Shraddha Shirguppe, Ahlim Lee, Youngju Song, Pazhanichamy Kalailingam, Claire E. Fong, Aarushi Gandhi, Meehyun Kim, Diana Tambala, Adam Vernon Crain, Casey A. Maguire, Ulrich H. Von Andrian, Christian L. Lino Cardenas, Sekeun Kim, Benjamin P. Kleinstiver, Mark E. Lindsay, Patricia L. Musolino, Rajeev Malhotra. "In-vivo base editing of ACTA2 R179H restores lymphatic function and immune cell homeostasis in a murine model of Multisystemic Smooth Muscle Dysfunction Syndrome (MSMDS)." **in preparation**

Co-author (immunology). Ran the Olink plasma proteomics across 12 patients and 6 controls and the flow-cytometry immunophenotyping of lymph-node leukocytes.

2026 Sung Ha Lim\*, Jiyeon Oh\*, Kyu-Hee Hwang, Taesic Lee, **Seong-Jun Kang**, Eung Ho Choi, Seung-Kuy Cha. "Skin-brain transcriptomic convergence: an integrative framework for predicting Alzheimer's disease from cutaneous aging signatures." **in preparation**

Co-author (methodology, single-cell analysis). Built the method that turns a meta-analysis of 8 skin-aging transcriptome datasets into gene sets and uses them to classify Alzheimer's disease in human brain transcriptomes. Reanalyzed 4 public skin and brain single-cell cohorts (295,243 cells and nuclei) with donor-level pseudobulk to map the candidate genes to specific cell types.

Spatial: <b>GeoMx DSP</b> run end to end, <b>Visium</b> , <b>MACSima</b> cyclic multiplexed immunofluorescence.                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Computational                        | <b>Python, R, Linux, and Git</b> ; scikit-learn, XGBoost/LightGBM/CatBoost, and PyTorch. Donor- or case-level validation and multimodal analysis of imaging, transcriptomic, and clinical data.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Cell, tissue & immunological assays  | Primary human T-cell isolation, expansion and functional assays; monocyte and dendritic-cell differentiation; mesenchymal stem cell culture. Enzymatic tissue digestion, Percoll enrichment, cell and nucleus isolation. High-dimensional flow cytometry (panels up to 24 markers); multiplex panel design; 10-color 6-way FACS. <b>Olink</b> targeted plasma proteomics (immune & neurology panels).                                                                                                                                                                                                                                                                                                                                                           |

**Microscopy & animal models**     Spinning-disk confocal (Nikon CSU-W1 SORA), point-scanning confocal (Leica SP8), two-photon; IHC/IF (frozen & FFPE) with quantitative image analysis. Non-human primates across three species (rhesus, cynomolgus, marmoset), including EAE and islet-transplantation studies; mouse immune profiling.

**Binding & protein interaction**     **Biacore SPR** and ELISA for affinity, kinetics, competition binding, receptor blockade, and cross-species comparison; functional validation in primary human T cells.

**Study execution & collaboration**     Study design, external-study coordination, multi-site sample QC, milestone tracking, regulatory documentation, and data review.

BOOKS

**Seong-Jun Kang**, Do-gyun Kim, Jin-seon Han. **AI Drug Discovery: A Practical Guide for Biomedical Researchers** (title translated). PanmunEducation. September 21, 2026. 548 pages. ISBN 979-11-5943-583-6. [YES24 Global](#)

The book covers molecular and protein data preparation, QSAR, ChemBERTa, graph neural networks, docking, virtual screening, candidate optimization, and follow-up experimental validation.

PATENTS

- 2024**     **Antagonistic Anti-CD40 Humanized Antibody.** Republic of Korea, Appl. No. 10-2024-0085972; registered 2024-07-01. Co-inventor.
- 2019**     **Immunosuppression Composition Comprising JAK Inhibitor.** Republic of Korea, Appl. No. 10-2014-3490000; registered 2019-08-20.

AWARDS & SCHOLARSHIPS

AWARDS

- Jun 2024**     **Grand Prize**, 2024 GPTers AI Hackathon (Project GAIA Team)
- Dec 2023**     **Grand Prize**, SBA Smart Workathon for Work Process Innovation
- Dec 2021**     **Excellence Award (Poster Presentation)**, 2021 Research Safety Contest, Seoul National University College of Medicine

| <b>Dec 2017</b> | <b>Best Research Award</b> , 2017 Infection and Immunity Research Festival, Department of Microbiology and Immunology, Seoul National University College of Medicine |
| <b>Nov 2017</b> | <b>Best Presentation Award (Poster Presentation)</b> , 2017 Annual Meeting of the Korean Association of Immunologists                                                |
| <b>May 2017</b> | <b>Best Poster in Congress Award</b> , 2017 American Transplant Congress, Chicago                                                                                    |

#### SCHOLARSHIPS

|                          |                                                                                                         |
|--------------------------|---------------------------------------------------------------------------------------------------------|
| <b>Sep 2019–Aug 2020</b> | <b>Research Scholarship for Ph.D. Candidates</b> , National Research Foundation of Korea (NRF)          |
| <b>Sep 2014–Aug 2016</b> | <b>Lecture and Research Support Scholarship</b> , Dean of Seoul National University College of Medicine |
| <b>Mar 2012–Aug 2014</b> | <b>BK21 Research Scholarship</b> , BK21 Plus Biomedical Science Project, Seoul National University      |

#### SELECTED PRESENTATIONS

**Poster** KAI Annual Meeting, Incheon (2022) · Cytokine, Hawaii (2022) · American Transplant Congress, Chicago (2017) · The Transplantation Society, Hong Kong (2016) · IPITA/IXA/CTS, Melbourne (2015) · TREG, Shanghai (2012)

## ■ SELECTED GRANT WRITING & PROGRAM FUNDING

INDUSTRY · PB IMMUNE THERAPEUTICS (MANAGER → ASSOCIATE DIRECTOR)

| <b>FUNDING AGENCY / SPONSOR</b>           | <b>PROJECT</b>                                                                                | <b>PERIOD</b> | <b>BUDGET (USD)</b> | <b>ROLE / CONTRIBUTION</b>                                        |
|-------------------------------------------|-----------------------------------------------------------------------------------------------|---------------|---------------------|-------------------------------------------------------------------|
| <b>Korea Drug Development Fund (KDDF)</b> | Anti-CD40 antibody lead selection and optimization (multiple sclerosis)                       | 2021–2023     | <b>~\$571,000</b>   | <i>Lead proposal writer (&gt;90% of proposal &amp; execution)</i> |
| <b>Korea Drug Development Fund (KDDF)</b> | Anti-CD40 lead compound (PB101): efficacy and pharmacodynamic biomarkers (pemphigus vulgaris) | 2022–2024     | <b>~\$321,000</b>   | <i>Lead proposal writer (&gt;90% of proposal &amp; execution)</i> |

| FUNDING AGENCY / SPONSOR            | PROJECT                                                                              | PERIOD    | BUDGET (USD) | ROLE / CONTRIBUTION                             |
|-------------------------------------|--------------------------------------------------------------------------------------|-----------|--------------|-------------------------------------------------|
| Ministry of SMEs and Startups (MSS) | Scale-up Funding for Tech Commercialization                                          | 2022–2023 | ~\$222,000   | Lead proposal writer; managed >90% of execution |
| Ministry of SMEs and Startups (MSS) | Early-stage startup R&D: anti-CD40 biologic (PB-40N) to prevent anti-drug antibodies | 2021–2022 | ~\$74,000    | Lead proposal writer & core researcher          |
| NAVER Corporation                   | Engineered regulatory T cells for immune-mediated diseases (PB20X_Treg)              | 2023–2026 | ~\$128,000   | Proposal & study design (~50%)                  |

#### DOCTORAL TRAINING · SEOUL NATIONAL UNIVERSITY

| FUNDING AGENCY / SPONSOR                                         | PROJECT                                                                                         | PERIOD          | BUDGET (USD) | ROLE / CONTRIBUTION                                       |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|-----------------|--------------|-----------------------------------------------------------|
| Ministry of Science and ICT (MSIT)                               | Multi-layered immune-disease single-cell map for molecular target discovery (SCAID, A9-22-1-05) | 2022–2028 (3+3) | ~\$1.6M      | Participated in proposal writing (>30%)                   |
| Ministry of Education (MOE) & Ministry of Science and ICT (MSIT) | Laboratory-Specialized Tech-Transfer & R&BD Grant                                               | 2020–2021       | ~\$40,000    | Grant writing, experimental design & technical validation |

All grants were held by the institutional Principal Investigator (Ph.D. advisor at SNU; company CEO/CSO at PB Immune Therapeutics); the listed roles reflect the applicant's contribution to proposal writing and project execution, **not as PI**. Budgets converted at ~₩1,400 / USD.

## MENTORING AND RESEARCH TRAINING

| YEAR | MENTEE / ROLE AT TIME                      | CURRENT AFFILIATION                                                                                                                                                  | RESEARCH TRAINING                                                           |

| 2023 | <b>Sung Bin Bae, M.S.</b><br>Incoming graduate student               | Staff, Biologics CMC Team, Yuhan Corporation, Seoul, Republic of Korea                                                  | Cell culture, flow cytometry, and GeoMx DSP spatial transcriptomics data analysis.                           |
| 2024 | <b>Mi Jeong Oh, M.S.</b><br>Manager, PB Immune Therapeutics          | Manager; PB Immune Therapeutics, Seoul, Republic of Korea                                                               | Experimental design for animal sample collection, ELISA and SPR assay design, and 10x Genomics scRNA-seq.    |
| 2024 | <b>Eun Sol Jo, B.S.</b><br>Assistant Manager, PB Immune Therapeutics | Assistant Manager; PB Immune Therapeutics, Seoul, Republic of Korea                                                     | Animal experiment design and evaluation of a mouse model of experimental autoimmune encephalomyelitis (EAE). |

## REFERENCES

**Chung-Gyu Park, M.D., Ph.D.**

Professor, Microbiology & Immunology / Biomedical Sciences, SNU College of Medicine; CEO/CSO, PB Immune Therapeutics  
· chgpark@snu.ac.kr

*Doctoral advisor and industry supervisor; directed the anti-CD40 antibody program.*

**Hyun Je Kim, M.D., Ph.D.**

Assistant Professor, Microbiology & Immunology / Biomedical Sciences; Interdisciplinary Program in Artificial Intelligence (IPAI), SNU · tte9801@snu.ac.kr

*Corresponding on the several single-cell studies; supervised the computational work.*

**Seung-Kuy Cha, Ph.D.**

Professor, Dept. of Physiology & Global  
Medical Science, Yonsei University Wonju  
College of Medicine · skcha@yonsei.ac.kr

*Most recent research supervisor (2025–2026).*

**Jeong Seok Lee, M.D., Ph.D.**

Associate Professor, Graduate School of  
Medical Science & Engineering, KAIST, Daejeon  
· chemami@kaist.ac.kr

*Corresponding author, PDE4D / Nature Immunology study.*
