#### MANUSCRIPTS IN PREPARATION

- 2026** Kangsan Roh\*, Sabyasachi Das\*, **Seong-Jun Kang**, Olga Barreiro, Rodrigo Javier Gonzalez, Timothy P. Padera, Shraddha Shirguppe, Ahlim Lee, Youngju Song, Pazhanichamy Kalailingam, Claire E. Fong, Aarushi Gandhi, Meehyun Kim, Diana Tambala, Adam Vernon Crain, Casey A. Maguire, Ulrich H. Von Andrian, Christian L. Lino Cardenas, Sekeun Kim, Benjamin P. Kleinstiver, Mark E. Lindsay, Patricia L. Musolino, Rajeev Malhotra. "In-vivo base editing of ACTA2 R179H restores lymphatic function and immune cell homeostasis in a murine model of Multisystemic Smooth Muscle Dysfunction Syndrome (MSMDS)." in preparation
- Co-author (immunology). Ran the Olink plasma proteomics across 12 patients and 6 controls and the flow-cytometry immunophenotyping of lymph-node leukocytes.*

## ■ TECHNICAL EXPERTISE

|                                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Binding &amp; protein interaction</b>       | <b>Surface plasmon resonance (Biacore)</b> run hands-on for antibody lead work: association and dissociation rates, affinity ranking across a candidate panel, receptor-blocking confirmation, and human / non-human-primate cross-reactivity. <b>ELISA</b> -based affinity and epitope analysis; competition binding. Antibody lead selection and optimization from candidate panel to registered patent. Functional validation of a peptide inhibitor of calcineurin in primary human T cells (CABIN1 core peptide, <i>Exp Mol Med</i> 2022). |
| <b>Program &amp; external execution</b>        | CRO and core-facility work from study design and placement through data delivery and go/no-go calls; assay conditions specified to the vendor; regulatory documentation for a therapeutic antibody program; funder milestones and reporting; multi-site sample QC across a 700-donor collection.                                                                                                                                                                                                                                                |
| <b>Cell, tissue &amp; immunological assays</b> | Primary human T-cell isolation, expansion and functional assays; monocyte and dendritic-cell differentiation; mesenchymal stem cell culture. Enzymatic tissue digestion, Percoll enrichment, cell and nucleus isolation. High-dimensional flow cytometry (panels up to 24 markers); multiplex panel design; 10-color 6-way FACS. <b>Olink</b> targeted plasma proteomics (immune & neurology panels).                                                                                                                                           |
| <b>Single-cell / spatial / multi-omic</b>      | scRNA-seq, scTCR-seq, snRNA/snATAC; 10x 5'/3' library generation and <b>10x Chromium Connect</b> automated preparation. <b>Seurat</b> , <b>Scanpy</b> , <b>Squidpy</b> , <b>Monocle3</b> , <b>CellChat/NicheNet</b> ; scVI/scANVI, batch integration, <b>consensus NMF</b> ; Milo KNN-graph differential abundance, GLIPH, InferCNV. Custom UMI-aware, BAM-level isoform analysis code (Python). Spatial: <b>GeoMx DSP</b> run end to end, <b>Visium</b> , <b>MACSima</b> cyclic multiplexed immunofluorescence.                                |
| <b>Computational</b>                           | Python: scikit-learn, XGBoost/LightGBM/CatBoost, <b>PyTorch</b> ; AUC-validated classifiers held out on independent cohorts; multimodal deep-learning integration (imaging + transcriptomic + clinical). Linux servers · R/RStudio · Git-based reproducible analysis.                                                                                                                                                                                                                                                                           |
| <b>Microscopy &amp; animal models</b>          | Spinning-disk confocal (Nikon CSU-W1 SORA), point-scanning confocal (Leica SP8), two-photon; IHC/IF (frozen & FFPE) with quantitative image analysis. Non-human primates across three species (rhesus, cynomolgus, marmoset), including EAE and islet-transplantation studies; mouse immune profiling.                                                                                                                                                                                                                                          |

BOOKS

Seong-Jun Kang, Do-gyun Kim, Jin-seon Han. **AI Drug Discovery: A Practical Guide for Medical and Biomedical Researchers** (title translated). Beommun Education. Forthcoming September 21, 2026. 548 pages. ISBN 979-11-5943-583-6. [Publisher](#)

The book covers molecular and protein data preparation, QSAR, ChemBERTa, graph neural networks, docking, virtual screening, candidate optimization, and follow-up experimental validation.

SELECTED GRANT WRITING & PROGRAM FUNDING

INDUSTRY · PB IMMUNE THERAPEUTICS (MANAGER – ASSOCIATE DIRECTOR)

| FUNDING AGENCY / SPONSOR            | PROJECT                                                                                       | PERIOD    | BUDGET (USD) | ROLE / CONTRIBUTION                                 |
|-------------------------------------|-----------------------------------------------------------------------------------------------|-----------|--------------|-----------------------------------------------------|
| Korea Drug Development Fund (KDDF)  | Anti-CD40 antibody lead selection and optimization (multiple sclerosis)                       | 2021–2023 | ~\$571,000   | Lead proposal writer (>90% of proposal & execution) |
| Korea Drug Development Fund (KDDF)  | Anti-CD40 lead compound (PB101): efficacy and pharmacodynamic biomarkers (pemphigus vulgaris) | 2022–2024 | ~\$321,000   | Lead proposal writer (>90% of proposal & execution) |
| Ministry of SMEs and Startups (MSS) | Scale-up Funding for Tech Commercialization                                                   | 2022–2023 | ~\$222,000   | Lead proposal writer; managed >90% of execution     |
| Ministry of SMEs and Startups (MSS) | Early-stage startup R&D: anti-CD40 biologic (PB-40N) to prevent anti-drug antibodies          | 2021–2022 | ~\$74,000    | Lead proposal writer & core researcher              |
| NAVER Corporation                   | Engineered regulatory T cells for immune-mediated diseases (PB20X_Treg)                       | 2023–2026 | ~\$128,000   | Proposal & study design (~50%)                      |

DOCTORAL TRAINING · SEOUL NATIONAL UNIVERSITY

| FUNDING AGENCY / SPONSOR                                         | PROJECT                                                                                         | PERIOD          | BUDGET (USD) | ROLE / CONTRIBUTION                                       |
|------------------------------------------------------------------|-------------------------------------------------------------------------------------------------|-----------------|--------------|-----------------------------------------------------------|
| Ministry of Science and ICT (MSIT)                               | Multi-layered immune-disease single-cell map for molecular target discovery (SCAID, A9-22-1-05) | 2022–2028 (3+3) | ~\$1.6M      | Participated in proposal writing (>30%)                   |
| Ministry of Education (MOE) & Ministry of Science and ICT (MSIT) | Laboratory-Specialized Tech-Transfer & R&BD Grant                                               | 2020–2021       | ~\$40,000    | Grant writing, experimental design & technical validation |

All grants were held by the institutional Principal Investigator (Ph.D. advisor at SNU; company CEO/CSO at PB Immune Therapeutics); the listed roles reflect the applicant's contribution to proposal writing and project execution, **not as PI**. Budgets converted at ≈ ₩1,400 / USD.

AWARDS, PATENTS & SCHOLARSHIPS
