

RESEARCH PROFILE

I am an immunologist with hands-on experience in Biacore SPR, ELISA, therapeutic antibody evaluation, and primary–cell functional assays. At PB Immune Therapeutics, I led anti–CD40 candidate evaluation and coordinated external studies from assay specification through data review and advancement decisions. I would bring binding measurements, experimental troubleshooting, and synthesis–and–testing coordination to the Keating Lab's peptide design campaign.

POSITION–RELEVANT EXPERTISE

- Binding measurements.** Hands-on **Biacore SPR** for association, dissociation, affinity, receptor blockade, and human–primate cross–reactivity, supported by ELISA binding and competition assays.
- Candidate evaluation.** Anti–CD40 candidate comparison, repeat testing, specificity review, and advancement into non–human–primate efficacy studies.
- External–study coordination.** Study and assay specification, CRO and core–facility coordination, raw–data review, delivery tracking, and go/no–go recommendations.
- Quantitative analysis.** Single–cell and spatial profiling, targeted proteomics, and reproducible Python and R analysis with held–out evaluation.

EDUCATION

DEGREES

Ph.D. 2014–2023	Seoul National University, Seoul, Republic of Korea Department of Biomedical Sciences <i>Thesis: Exploration of the Role of Regulatory T cells in Various Pathogenic Contexts</i> Advisor: Chung–Gyu Park, M.D., Ph.D.
M.S. 2012–2014	Seoul National University, Seoul, Republic of Korea Department of Biomedical Sciences <i>Thesis: Enhanced LPS-Induced Monocyte Activation by Recombinant Human Soluble CD14</i> Advisor: Chung–Gyu Park, M.D., Ph.D.
B.S. 2008–2012	Sungkyunkwan University, Suwon, Republic of Korea Department of Genetic Engineering

RESEARCH & PROFESSIONAL EXPERIENCE

Researcher (postdoctoral) 2025–present	Yonsei University Wonju College of Medicine · Dept. of Physiology / Organelle Medicine Research Center, Wonju, Republic of Korea Developed deep–learning approaches that combine imaging, transcriptomic, and clinical data in predictive models.
Associate Director Sep 2023–Aug 2025	PB Immune Therapeutics Inc. · Dept. of Basic Research, Seoul, Republic of Korea I led the humanized anti–CD40 antibody program, including primate efficacy studies and regulatory documentation. I oversaw CRO and core–facility studies and made candidate–advancement decisions after reviewing data. I also built the in–house single–cell and spatial analysis pipeline.

Manager May 2021–Aug 2023	PB Immune Therapeutics Inc. · Dept. of Basic Research, Seoul, Republic of Korea I ran anti-CD40 antibody lead-selection research supported by two KDDF awards. I wrote the proposals for these awards, covering lead selection and optimization for multiple sclerosis and the PB101 efficacy and pharmacodynamic biomarker program for pemphigus vulgaris.
Project Contributor 2020–2023	Single Cell Atlas of Immune Diseases (SCAID) , Genomic Medicine Institute, Seoul National University, Seoul, Republic of Korea Contributed to the founding proposal and work within the funded program. Took part in milestone tracking, multi-site sample quality control, and coordination across principal investigators. The program covered more than 700 donors, eight organs, and 23 immune diseases.
Researcher Sep 2019–Apr 2021	Xenotransplantation Research Center, Seoul National University , Seoul, Republic of Korea Processed rhesus macaque tissues and performed longitudinal immune monitoring in transplantation studies.
Research Personnel (Military Service) Sep 2016–Aug 2019	Transplantation Research Institute, Seoul National University Medical Research Center , Seoul, Republic of Korea
Teaching Assistant Sep 2014–Aug 2016	Seoul National University College of Medicine · Dept. of Microbiology and Immunology, Seoul, Republic of Korea
BK21 Research Student Mar 2012–Aug 2014	BK21 Plus Biomedical Science Project, Seoul National University , Seoul, Republic of Korea

PUBLICATIONS · FIRST / CO-FIRST AUTHOR

2026	Woogil Song*, Seong-Jun Kang*, Taehee Stella Kim*, Seyoung Jung, Sung Hee Kim, Su Chan Park, Sung Hae Chang, Eun Young Lee, Tae-Gyun Kim, Hyun Je Kim, Jeong Seok Lee. "Conserved PDE4D short-isoform bias defines pathogenic Th1.17 state across human inflammatory diseases." <i>Nature Immunology</i>. in revision Co-first author. Isoform analysis of 251,055 memory CD4-positive T cells identified a PDE4D short-isoform bias in pathogenic Th1.17 cells. The study also tested selective inhibition.
2025	Seong-Jun Kang*, Yong-Hee Kim*, Thuy Nguyen-Phuong*, Yijoon Kim, Jin-Mi Oh, Jae-chun Go, DaeSik Kim, Chung-Gyu Park, Hyunsu Lee, Hyun Je Kim. "Immune cell-enriched single-cell RNA sequencing unveils the interplay between infiltrated CD8+ T resident memory cells and choroid plexus epithelial cells in Alzheimer's disease." <i>Journal of Neuroimmunology</i>. Download PDF Co-first author. Immune-enriched single-cell analysis of 11,587 mouse brain cells examined CD8-positive resident memory T cells and their interactions with choroid plexus epithelium.
2025	Seong-Jun Kang*, Jeong-Ryeol Gong*, Seon-Pil Jin, Jin-Mi Oh, Hyunjin Jin, Yuji Lee, Yewon Moon, Dongjun Kim, Hyo Jeong Nam, Hyun Seung Choi, Sanha Hwang, Yun Jung Huh, Kyung Yeon Han, Jihwan Moon, Jongsuk Chung, Woong-Yang Park, Chung-Gyu Park, Hyun Je Kim, Jeong Eun Kim. "Deciphering Dysfunctional Regulatory T Cells in Atopic Dermatitis." <i>Allergy</i>. Download PDF Co-first author. Single-cell profiling and functional assays examined skin-homing regulatory T cells in atopic dermatitis. OX40 was increased alongside impaired suppressive function.

2024	Jong-Min Kim*, Seong-Jun Kang* , So-Hee Hong*, Hyunwoo Chung, Jun-Seop Shin, Byoung-Hoon Min, Hyun Je Kim, Jongwon Ha, Chung-Gyu Park. "Long-term control of diabetes by tofacitinib-based immunosuppressive regimen after allo-islet transplantation in diabetic rhesus monkeys that rejected previously transplanted porcine islets." Xenotransplantation . Download PDF Co-first author. A tofacitinib-based regimen supported long-term diabetes control after islet allotransplantation in rhesus macaques. The work included longitudinal immune monitoring.
2022	Youngkyoung Lim*, Seong-Jun Kang* , Beom Keun Cho, Hyun Je Kim, ... Chong Hyun Won, Chung-Gyu Park. "Intra-tumoral heterogeneity and immune escape of melanoma arising from congenital melanocytic nevus revealed by spatial gene expression profiling." JEADV . Download PDF Co-first author. GeoMx profiling across 16 regions examined melanoma heterogeneity by invasion depth. HLA class I and II expression decreased with greater invasion.
2019	Jong-Min Kim*, Jun-Seop Shin*, Byoung-Hoon Min*, Seong-Jun Kang* , Il-Hee Yoon, Hyunwoo Chung, Jiyeon Kim, Eung-Soo Hwang, Jongwon Ha, Chung-Gyu Park. "JAK3 inhibitor-based immunosuppression in allogeneic islet transplantation in cynomolgus monkeys." Islets . Download PDF Co-first author. The study tested JAK3 inhibitor-based immunosuppression in cynomolgus macaques receiving allogeneic islet transplants, as an approach to controlling transplant rejection.

CONTRIBUTING AUTHOR

2026	Jung Ho Lee*, Sung Ha Lim*, Hyungdon Kook, Seong-Jun Kang , Geon Lee, Brian Hyohyoung Lee, Hyunsung Nam, YongJun Kim, Christine Suh-Yun Joh, Soyoung Jeong, Dongryeol Shin, Hyun Je Kim, Jiyoung Ahn. "Mycosis Fungoides-like Atopic Dermatitis Represents a Th22-dominant Inflammatory Endotype." Allergy . Single-cell RNA and TCR analysis identified a reactive, oligoclonal Th22 endotype in mycosis fungoides-like atopic dermatitis. The study distinguished this inflammatory state from malignancy.
2024	Brian Hyohyoung Lee*, Yoon Ji Bang*, Sung Ha Lim*, Seong-Jun Kang , Sung Hee Kim, Seunghee Kim-Schulze, Chung-Gyu Park, Hyun Je Kim, Tae-Gyun Kim. "High-dimensional profiling of regulatory T cells in psoriasis reveals an impaired skin-trafficking property." eBioMedicine . Download PDF High-dimensional immune profiling examined regulatory T cells in psoriasis. The study identified an impaired skin-trafficking phenotype in this population.
2024	Youngkyoung Lim*, Beom Keun Cho*, Seong-Jun Kang , Soyoung Jeong, Hyun Je Kim, Jiyeon Baek, Ji Hwan Moon, Cheol Lee, Chan-Sik Park, Je-Ho Mun, Chong Hyun Won, Chung-Gyu Park. "Spatial transcriptomic analysis of tumour-immune cell interactions in melanoma arising from congenital melanocytic nevus." JEADV . Download PDF GeoMx spatial transcriptomics examined tumour-immune cell interactions in melanoma arising from congenital melanocytic nevus, retaining the tissue locations of the measured gene expression.
2023	Sunyoung Jung*, Sunho Lee, Hyun Je Kim, Sueon Kim, Ji Hwan Moon, Hyunwoo Chung, Seong-Jun Kang , Chung-Gyu Park. "Mesenchymal stem cell-derived extracellular vesicles subvert Th17 cells by destabilizing RORyt through posttranslational modification." Experimental & Molecular Medicine . Mesenchymal stem cell-derived extracellular vesicles suppressed Th17 cells. The study linked this effect to destabilization of RORyt through post-translational modification.
2022	Sangho Lee, Han-Teo Lee, Young Ah Kim, Il-Hwan Lee, Seong-Jun Kang , Kyeongpyo Sim, Chung-Gyu Park, Kyungho Choi, Hong-Duk Youn. "The optimized core peptide derived from CABIN1 efficiently inhibits calcineurin-mediated T-cell activation." Experimental & Molecular Medicine . An optimized peptide inhibited calcineurin-mediated T-cell activation. The study examined peptide-based suppression of T-cell responses.
2021	So Hee Hong, Hyun Je Kim, Seong-Jun Kang , Chung-Gyu Park. "Novel Immunomodulatory Approaches for Porcine Islet Xenotransplantation." Current Diabetes Reports . Download PDF This review examined immunomodulatory approaches for porcine islet xenotransplantation, with a focus on strategies for controlling immune responses to transplanted islets.

- 2020** Sunho Lee, Sueon Kim, Hyunwoo Chung, Ji Hwan Moon, **Seong-Jun Kang**, Chung-Gyu Park. "Mesenchymal stem cell-derived exosomes suppress proliferation of T cells by inducing cell cycle arrest through p27kip1/Cdk2 signaling." *Immunology Letters*.
Mesenchymal stem cell-derived exosomes suppressed T-cell proliferation. The study linked this effect to cell-cycle arrest through p27kip1/Cdk2 signaling.
- 2019** Hyun Je Kim, Ji Hwan Moon, Hyunwoo Chung, Jun-Seop Shin, Bongi Kim, Jong Min Kim, Jung-Sik Kim, Il-Hee Yoon, Byoung-Hoon Min, **Seong-Jun Kang**, Yong-Hee Kim, Kyuri Jo, Joungmin Choi, Heejoon Chae, Won Woo Lee, Sun Kim, Chung-Gyu Park. "Bioinformatic analysis of peripheral blood RNA-sequencing sensitively detects the cause of late graft loss following overt hyperglycemia in pig-to-non-human primate islet xenotransplantation." *Scientific Reports*.
Peripheral-blood RNA sequencing was used to investigate late graft loss after hyperglycemia in pig-to-primate islet transplantation, using bioinformatic analysis of blood gene expression.
- 2018** Byoung-Hoon Min, Jun-Seop Shin, Jong-Min Kim, **Seong-Jun Kang**, Hyun-Je Kim, Il-Hee Yoon, Su-Kyoung Park, Ji-won Choi, Min-Suk Lee, Chung-Gyu Park. "Delayed revascularization of islets after transplantation by IL-6 blockade in pig-to-non-human primate islet xenotransplantation model." *Xenotransplantation*.
The study examined IL-6 blockade in a pig-to-primate islet transplantation model. Blocking IL-6 was associated with delayed revascularization of the transplanted islets.
- 2018** Jun-Seop Shin, Jong-Min Kim, Byoung-Hoon Min, Il Hee Yoon, Hyun Je Kim, Jung-Sik Kim, Yong-Hee Kim, **Seong-Jun Kang**, Jiyeon Kim, Hee-Jung Kang, Dong-Gyun Lim, Eung-Soo Hwang, Jongwon Ha, Sang-Joon Kim, Wan Beom Park, Chung-Gyu Park. "Pre-clinical results in pig-to-non-human primate islet xenotransplantation using anti-CD40 antibody (2C10R4)-based immunosuppression." *Xenotransplantation*.
Preclinical pig-to-primate islet transplantation was studied under an anti-CD40 antibody regimen using 2C10R4, examining this approach to immunosuppression in the transplant setting.
- 2018** Jong-Min Kim, Jun-Seop Shin, Byoung-Hoon Min, Il Hee Yoon, **Seong-Jun Kang**, Won-Young Jeong, Sang-Joon Kim, Chung-Gyu Park. "Pre-Clinical Results of Islet Allo-Transplantation Using JAK Inhibitor as Replacement for Tacrolimus in Cynomolgus Monkeys." *Transplantation*.
The study evaluated a JAK inhibitor as a replacement for tacrolimus in cynomolgus macaques receiving allogeneic islet transplants.
- 2018** Jung-Sik Kim, Hyunwoo Chung, Nari Byun, **Seong-Jun Kang**, Sunho Lee, Jun-Seop Shin, Chung-Gyu Park. "Construction of EMSC-islet co-localizing composites for xenogeneic porcine islet transplantation." *Biochemical and Biophysical Research Communications*.
The study constructed EMSC-islet composites for xenogeneic porcine islet transplantation. It examined a design that placed the two cell components together.

MANUSCRIPTS IN PREPARATION

- 2026** Kangsan Roh*, Sabyasachi Das*, **Seong-Jun Kang**, Olga Barreiro, Rodrigo Javier Gonzalez, Timothy P. Padera, Shraddha Shirguppe, Ahlim Lee, Youngju Song, Pazhanichamy Kalailingam, Claire E. Fong, Aarushi Gandhi, Meehyun Kim, Diana Tambala, Adam Vernon Crain, Casey A. Maguire, Ulrich H. Von Andrian, Christian L. Lino Cardenas, Sekeun Kim, Benjamin P. Kleinstiver, Mark E. Lindsay, Patricia L. Musolino, Rajeev Malhotra. "In-vivo base editing of ACTA2 R179H restores lymphatic function and immune cell homeostasis in a murine model of Multisystemic Smooth Muscle Dysfunction Syndrome (MSMDS)." in preparation
Work in preparation examines ACTA2 base editing and lymphatic function in MSMDS. My contribution included Olink plasma proteomics and lymph-node immune-cell profiling.

■ TECHNICAL EXPERTISE

Binding kinetics and affinity

Hands-on **Biacore SPR** for association and dissociation kinetics, affinity ranking, receptor blockade, and human/non-human-primate cross-reactivity. **ELISA** binding, competition, and epitope analysis. Antibody candidate comparison and lead selection.

Therapeutic lead development	Humanized anti-CD40 antibody program from candidate comparison through non-human-primate studies. Assay design, external study coordination, raw-data review, regulatory documentation, and candidate-advancement decisions.
External studies and collaboration	CRO and core-facility study design, assay specifications, data review, and milestone tracking. Participation in outsourced antibody and AAV manufacturing collaborations involving Samsung Biologics and WuXi. Participation in early joint-development research with Merck, CSL, and Johnson & Johnson.
Cell, tissue & immunological assays	Primary human T-cell isolation, expansion and functional assays; monocyte and dendritic-cell differentiation; mesenchymal stem cell culture. Enzymatic tissue digestion, Percoll enrichment, cell and nucleus isolation. High-dimensional flow cytometry (panels up to 24 markers); multiplex panel design; 10-color 6-way FACS. Olink targeted plasma proteomics (immune & neurology panels).
Single-cell / spatial / multi-omic	scRNA-seq, scTCR-seq, snRNA/snATAC; 10x 5'/3' library generation and 10x Chromium Connect automated preparation. Seurat , Scanpy , Squidpy , Monocle3 , CellChat/NicheNet ; scVI/scANVI, batch integration, consensus NMF ; Milo KNN-graph differential abundance, GLIPH, InferCNV. Custom UMI-aware, BAM-level isoform analysis code (Python). Spatial: GeoMx DSP run end to end, Visium , MACSima cyclic multiplexed immunofluorescence.
Computational	Python: scikit-learn, XGBoost/LightGBM/CatBoost, PyTorch ; AUC-validated classifiers held out on independent cohorts; multimodal deep-learning integration (imaging + transcriptomic + clinical). Linux servers · R/RStudio · Git-based reproducible analysis.
Microscopy & animal models	Spinning-disk confocal (Nikon CSU-W1 SORA), point-scanning confocal (Leica SP8), two-photon; IHC/IF (frozen & FFPE) with quantitative image analysis. Non-human primates across three species (rhesus, cynomolgus, marmoset), including EAE and islet-transplantation studies; mouse immune profiling.

BOOKS

Seong-Jun Kang, Do-gyun Kim, Jin-seon Han. **AI Drug Discovery: A Practical Guide for Medical and Biomedical Researchers** (title translated). Beommun Education. Forthcoming September 21, 2026. 548 pages. ISBN 979-11-5943-583-6. [Publisher](#)

The book covers molecular and protein data preparation, QSAR, ChemBERTa, graph neural networks, docking, virtual screening, candidate optimization, and follow-up experimental validation.

SELECTED GRANT WRITING & PROGRAM FUNDING

INDUSTRY · PB IMMUNE THERAPEUTICS (MANAGER – ASSOCIATE DIRECTOR)

FUNDING AGENCY / SPONSOR	PROJECT	PERIOD	BUDGET (USD)	ROLE / CONTRIBUTION
Korea Drug Development Fund (KDDF)	Anti-CD40 antibody lead selection and optimization (multiple sclerosis)	2021–2023	~\$571,000	Lead proposal writer (>90% of proposal & execution)
Korea Drug Development Fund (KDDF)	Anti-CD40 lead compound (PB101): efficacy and pharmacodynamic biomarkers (pemphigus vulgaris)	2022–2024	~\$321,000	Lead proposal writer (>90% of proposal & execution)
Ministry of SMEs and Startups (MSS)	Scale-up Funding for Tech Commercialization	2022–2023	~\$222,000	Lead proposal writer; managed >90% of execution
Ministry of SMEs and Startups (MSS)	Early-stage startup R&D: anti-CD40 biologic (PB-40N) to prevent anti-drug antibodies	2021–2022	~\$74,000	Lead proposal writer & core researcher

FUNDING AGENCY / SPONSOR	PROJECT	PERIOD	BUDGET (USD)	ROLE / CONTRIBUTION
NAVER Corporation	Engineered regulatory T cells for immune-mediated diseases (PB20X_Treg)	2023–2026	~\$128,000	Proposal & study design (~50%)

DOCTORAL TRAINING · SEOUL NATIONAL UNIVERSITY

FUNDING AGENCY / SPONSOR	PROJECT	PERIOD	BUDGET (USD)	ROLE / CONTRIBUTION
Ministry of Science and ICT (MSIT)	Multi-layered immune-disease single-cell map for molecular target discovery (SCAID, A9-22-1-05)	2022–2028 (3+3)	~\$1.6M	Participated in proposal writing (>30%)
Ministry of Education (MOE) & Ministry of Science and ICT (MSIT)	Laboratory-Specialized Tech-Transfer & R&BD Grant	2020–2021	~\$40,000	Grant writing, experimental design & technical validation

I participated in proposal writing and project execution for the awards listed above. Budgets are approximate conversions at KRW 1,400 per USD. Project periods are award periods, not appointment dates.

AWARDS, PATENTS & SCHOLARSHIPS

PATENTS

2024	Antagonistic Anti-CD40 Humanized Antibody. Republic of Korea, Appl. No. 10-2024-0085972; registered 2024-07-01. Co-inventor.
2019	Immunosuppression Composition Comprising JAK Inhibitor. Republic of Korea, Appl. No. 10-2014-3490000; registered 2019-08-20.

AWARDS

Jun 2024	Grand Prize, 2024 GPTers AI Hackathon (Project GAIA Team)
Dec 2023	Grand Prize, SBA Smart Workathon for Work Process Innovation
Dec 2021	Excellence Award (Poster Presentation), 2021 Research Safety Contest, Seoul National University College of Medicine
Dec 2020	Excellence Award (Poster Presentation), 2020 Research Safety Contest, Seoul National University College of Medicine
Dec 2017	Best Research Award, 2017 Infection and Immunity Research Festival, Department of Microbiology and Immunology, Seoul National University College of Medicine
Nov 2017	Best Presentation Award (Poster Presentation), 2017 Annual Meeting of the Korean Association of Immunologists
May 2017	Best Poster in Congress Award, 2017 American Transplant Congress, Chicago

SCHOLARSHIPS

Sep 2019–Aug 2020	Research Scholarship for Ph.D. Candidates, National Research Foundation of Korea (NRF)
Sep 2014–Aug 2016	Lecture and Research Support Scholarship, Dean of Seoul National University College of Medicine
Mar 2012–Aug 2014	BK21 Research Scholarship, BK21 Plus Biomedical Science Project, Seoul National University

■ SELECTED PRESENTATIONS

Poster KAI Annual Meeting, Incheon (2022) · Cytokine, Hawaii (2022) · American Transplant Congress, Chicago (2017) · The Transplantation Society, Hong Kong (2016) · IPITA/IXA/CTS, Melbourne (2015) · TREG, Shanghai (2012)

■ MENTORING AND RESEARCH TRAINING

YEAR	MENTEE / ROLE AT TIME	CURRENT AFFILIATION	RESEARCH TRAINING
2013	Sung Ha Lim, M.D., Ph.D. Student intern	Postdoctoral Fellow; Laboratory of Shadmehr Demehri, M.D., Ph.D.; Department of Dermatology, Massachusetts General Hospital; Harvard Medical School, Boston, MA, USA	Cell culture, Western blotting, flow cytometry, and C57BL/6 mouse breeding.
2014	Soyoung Jeong, Ph.D. Student intern	Postdoctoral Associate; Medical Research Center, Seoul National University, Seoul, Republic of Korea	Cell culture, flow cytometry, and in vivo mouse experiments.
2016	Sowon Choi, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	Mouse pancreatic islet isolation, pancreatic islet beta-cell functional assays, and ion channel assays.
2021	Hyo Jeong Nam, M.S. Incoming graduate student	Visiting Scholar; Laboratory of Seunghee Kim-Schulze, Ph.D.; Department of Immunology and Immunotherapy; Icahn School of Medicine at Mount Sinai, New York, NY, USA; Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	GeoMx DSP, T-cell functional assays, and single-cell RNA sequencing (scRNA-seq) data analysis using R.
2021	Beom Keun Cho, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	GeoMx DSP, mouse breeding, cell culture, T-cell functional assays, and scRNA-seq data analysis using R.
2021	Minji Kang, Ph.D. Incoming graduate student	Postdoctoral Associate; Transplantation Research Institute; Seoul National University Medical Research Center, Seoul, Republic of Korea	GeoMx DSP spatial transcriptomics data analysis and T-cell functional assays.
2021	Jung Ho Lee, M.S. Incoming graduate student	Visiting Scholar; Laboratory of Ulrich von Andrian, M.D., Ph.D.; Department of Immunology, Harvard Medical School, Boston, MA, USA; Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	scRNA-seq data analysis using R.
2021	Hyun Seung Choi, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	scRNA-seq data analysis using R.
2022	Yuji Lee, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	Regulatory T-cell suppression assays and scRNA-seq data analysis using R and machine-learning models.
2022	Sanha Hwang, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	Regulatory T-cell suppression assays and scRNA-seq data analysis using R and machine-learning models.
2022	Dongjun Kim, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	Regulatory T-cell suppression assays and scRNA-seq data analysis using R and machine-learning models.

YEAR	MENTEE / ROLE AT TIME	CURRENT AFFILIATION	RESEARCH TRAINING
2022	Yewon Moon, M.S. Incoming graduate student	Ph.D. Candidate; Department of Biomedical Sciences; Seoul National University Graduate School, Seoul, Republic of Korea	Regulatory T-cell suppression assays and scRNA-seq data analysis using R and machine-learning models.
2022	Karoliina Eliisa Ruhno, M.S. Incoming graduate student	Senior Researcher; IMBiologics, Seoul, Republic of Korea	Regulatory T-cell suppression assays.
2023	Moonki Chae, M.S. Student intern	Ph.D. Student; Department of Pathology; Johns Hopkins University, Baltimore, MD, USA	Immune-cell culture, flow cytometry, and scRNA-seq data analysis using machine-learning models and AI tools.
2023	Sung Bin Bae, M.S. Incoming graduate student	Researcher; Yuhan Corporation, Seoul, Republic of Korea	Cell culture, flow cytometry, and GeoMx DSP spatial transcriptomics data analysis.
2024	Mi Jeong Oh, M.S. Manager, PB Immune Therapeutics	Manager; PB Immune Therapeutics, Seoul, Republic of Korea	Experimental design for animal sample collection, ELISA and SPR assay design, and 10× Genomics scRNA-seq.
2024	Eun Sol Jo, B.S. Assistant Manager, PB Immune Therapeutics	Assistant Manager; PB Immune Therapeutics, Seoul, Republic of Korea	Animal experiment design and evaluation of a mouse model of experimental autoimmune encephalomyelitis (EAE).
